ABOUT ME

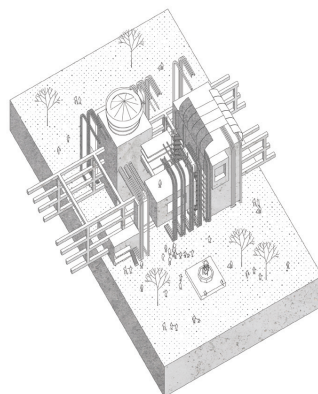

Being a descendant of various generations of migrants of Irish, English, Spanish, Belgian, Australian and Kiwi origin in South America explains the fact that English is my mother tongue, and that I have been raised bilingual.

Born in a family of sailors, I have sailed my entire life and have a strong attraction to the water and everything around it. I have lived in and among boats all my life, and given my interest in both the design of spaces and on-board living, it is easy to see why, during my last few professional years, I have focused in the yacht design industry.

I am currently self-employed, focusing on interior projects for private clients, while planning and pursuing my personal illustration projects.

LANGUAGE

- English | Native
- Spanish | Native
- French | Intermediate
- German | Beginner

EXPERIENCE

- present • Freelance. Design, planning and management of private homes and offices.
